About

I write the words that manifest realms...
I send photons of my devising into your eyeballs...

I specialize in reponsive front-end web development,
empowered by a background in graphic design, and
experience with full-stack MVC frameworks.

CDI College - 2006
Web Development Certificate

Canmore Collegiate High School - 2003
High School Diploma

Introduction to Interactive
Programming in Python
Coursera.org - 2014
Certificate of Completion
with Distinction

Work Experience

Web Developer
Project House Boutique Business Solutions Inc.

August 2016 - Current

Wordpress Theming - PHP - Javascript - HTML - SASS

At Project House, I meet with clients to discuss their website needs, work with our graphic designers to ensure the responsiveness of designs, and develop new websites for clients, mostly on the Wordpress platform. I also created a custom boilerplate Wordpress theme for us to use in the development of new websites.

Web Development Consultant
StemCell Technologies

May 2016 - July 2016

Python - Selenium - QA

I was brought on as a temporary consultant to assist in the launch of the new website. I migrated databases, wrote scripts in Python to automate various tasks, implemented a Selenium test suite to automate QA tasks, and helped deploy the new site to production.

Software Engineer
ReCollect Systems Inc.

June 2014 - Sept 2015

Custom MVC PERL Stack - Xamarin - C# - Coffeescript - HTML - LESS

At ReCollect, I created new features and diagnosed & fixed bugs for their SaaS full-stack web application and their iOS & Android apps. I also created design standards for their apps, as well as a suite of photoshop templates that enabled their customers and contractors to create artwork that complied with those standards.

Volunteer Experience

Volunteer Mentor
Ladies Learning Code

Nov 2013 - Current

With Ladies Learning Code, I train students in the basics of various programming languages and development frameworks, including Javascript, Python, and HTML & CSS.
